Projects

Enterprise Management System|***Java, Spring Boot, MySQL, REST API, Selenium*** — Jun. 2026 – Sep. 2026
Enterprise Backend & Management Application — *Live Demo* | *Source Code*
- Architected RESTful web services (Employee API & Auth API) utilizing Spring Boot framework.
- Automated web interactions using Selenium Chrome instances for accurate DOM element parsing.
- Executed full CRUD functionalities (Create, Read, Update, Delete) for enterprise data management.
- Integrated Spring Data JPA and Hibernate for database access and ORM mapping.

Expanse Tracker | ***React.js, Node.js, Express.js, C++, Java, MongoDB, REST API*** — Aug. 2026 – Oct. 2026
Full-Stack Financial Tracking Application — *Live Demo* | *Source Code*
- Engineered a responsive SPA using React.js for real-time tracking of income and expenses.
- Created scalable RESTful APIs with Node.js and Express.js to process transaction CRUD operations.
- Enforced JWT authentication and bcrypt password hashing to secure user accounts and transaction data.
- Modeled document schemas using MongoDB, executing fine-tuned database queries for financial reports.

Student Management System | ***HTML, CSS, Spring Boot, React.js, MySQL*** — Jul. 2026 – Sep. 2026
Comprehensive Educational Administration Portal — *Live Preview* | *Source Code*
- Built an administrative web platform to maintain student enrollment, course details, and academic metrics.
- Established secure API endpoints for data operations and streamlined MySQL queries for efficient record retrieval.

Achievements

LeetCode Problem Solving: Achieved **Knight Badge** and solved **200+** Data Structures and Algorithms problems in Java, covering Dynamic Programming, Trees, and Linked Lists.
Academic Achievement: Maintained an aggregate score of 7.515 / 10.0 CGPA in B.Tech CS coursework.
Open Source Deployment: Built and deployed web applications on GitHub Pages with CI/CD code workflows.
